Kärcher supports:

Quality Inspection service by our partner "ProQC"

Dear Sirs,

We would like to inform that we are going to order a quality inspection before the goods we have ordered at your company will be shipped by you.

For performing this quality inspection we have a long term partnership with the service "ProQC" which is acting in our name and which we like to be empowered by this writing.

ProQC will get in contact with you to agree the organization and how to perform the quality inspections according to our requirements.

Short notes:

We order the goods at your company

You should inform ProQC at least 5 working days in advance before the planned date of production and when the inspector could be in your company to perform the quality inspection. At the date of the inspection it is mandatory that the goods are 100% produced and at least 80% of the goods are already packed for shipping as defined.

Therefore ProQC has forwarded the form "Product Assessment Booking Request" to you. Please fill in the related data for each inspection and return to ProQC for booking the inspection.

If the inspector needs test equipment to check the quality criterions you have to forward the equipment to the inspector.

If quality checks can be performed only with special equipment or devices one of your staff being familiar with the test process has to perform the quality check under supervision of the inspector.

ProQC is going to forward the test report to our quality specialists. In case of non conform results we are going to forward the decision for further steps to ProQC. ProQC will forward the decision to you.

We kindly ask you to support our quality service partner ProQC in all items.

For further information please contact Mr. Feller marc.feller@de.kaercher.com
